Trex Contour | Chateau Grey

THE WORLDS #1 DECKING BRAND.

Trex has invented, defined and perfected composite decking with a stunning line-up of low-maintenance, high-performance, eco-friendly products that fundamentally change the way we live outdoors. At the forefront of composite decking technology, Trex was the first to combine the durability of recycled wood and plastic, formulating a high-performance protective shell over a stable composite core. That is why Trex is rated the world's #1 decking brand.

Trex decking is comprised of 95% recycled materials - namely, recycled wood chips, sawdust and plastic film. This earth-friendly formula, coupled with ground-breaking green manufacturing processes, makes it hard to find a company more actively aware of its impact on the environment. Trex offers consumers a truly environmentally responsible choice.

Transcend Range.....Pg. 10
Contour Range.....Pg. 11
Enhance Range.....Pg. 12

Trex composite decks have the beauty of natural hardwoods without the hassle of labour-intensive upkeep. There's no sanding, staining, or painting – just simple soap-and-water clean-up – because Trex believes that you should spend your time relaxing on your deck, not maintaining it.

JUST SOME OF THE ADVANTAGES OF CHOOSING TREX DECKING

- No risk of rotting, splitting, splintering or cracking
- Not prone to termite/insect attack
- Does not require any seasonal painting, sealing or staining
- Is available in a wide range of fade-resistant colours that will complement any outdoor environment
- Has all of the natural beauty of wood with none of the work

WHY A TREX COMPOSITE DECK IS A GREEN DECK

Trex eco-friendly composite decks are made from an innovative blend of 95% recycled wood and plastic film - that's almost the whole thing. On top of this, earth-friendly manufacturing processes are in place, reclaiming factory waste and eliminating the use of harmful chemicals. Trex offers consumers a truly environmentally responsible choice.

NO TREES ARE EVER FELLED IN THE MAKING OF TREX HIGH-PERFORMANCE COMPOSITE DECKING. EVER.

RECYCLED WOOD

Locally sourced reclaimed wood that would otherwise end up in a landfill finds its way into Trex high-performance composite decks. By using reclaimed sawdust, no tress are ever cut down to make a Trex decking board.

RECYCLED PLASTIC FILM

The recycled wood in Trex decks is combined with recycled plastic film from a variety of sources ranging from the overwrap on paper towels to dry cleaner bags, sandwich bags, newspaper sleeves, and grocery and shopping bags.

A SUSTAINABLE SUPPLY CHAIN

Trex takes an active role to ensure all of their supply vendors operate with ethical and responsible business practices. Approximately 95% of our supply vendors are based in the U.S.

THE BIG PICTURE

Trex works along with other U.S. Green Building Council members to transform the way building and communities are designed, built and operated with the goal of creating environmentally and socially responsible spaces that improve the quality of life.

WHY CHOOSE TREX? THE SECRET IS IN THE SHELL

Trex composite decks are wrapped in a high-performance protective shell that resists fading, staining, rot and splitting better than anything else out there, ensuring your Trex deck will look as new as it was the day it was installed for years to come.

TREX REALLY IS THE BEST CHOICE

- The Trex protective shell covers the board on three sides, offering superior weather protection where you need it most, while preserving the natural wood look for years
- The grooved edges of the boards allow for two different installation options - composite deck screws or secret fixings for a smooth finish with no visible screws
- Trex boards are as easy to install as timber, with no special tools required
- While all Trex decking offers a 25-Year Limited Residential Warranty against defects, their high-performance lines add an additional layer of coverage with a 25-Year Limited Residential Fade and Stain Warranty

Trex offers a comprehensive range of easy, low-maintenance decking options from which to choose, so you can enjoy the peace of mind that comes with installing a Trex deck, whatever your budget or project requirements.

Trex Transcend | Spiced Rum

TRANSCEND

TREX AT ITS VERY BEST

High performance, premium decking engineered with unrivalled fade, stain, scratch and mould resistance, created with hassle-free maintenance in mind for minimal down time from enjoying your outdoor spaces. Transcend is the leading Trex product line.

Designed in two distinct luxury colour styles; premium tropical colours with natural variegated shades or basic classic earth tones, all finished with a natural-looking and luxurious wood grain embossing.

CONTOUR

THE PERFECT SYNTHESIS OF DURABILITY AND ACCESSIBILITY

Engineered to maintain the same strength and durability of the traditional Trex composite core, wrapped in a modified protective shell, the Contour range offers long lasting performance against fade, stain, mould and mildew, while taking affordability into account.

Created in two beautiful colour styles; varying streaked nature-inspired hues or rich basic colour tones, both colour options are engrained with a unique patterned textured finish.

Trex Contour | Torino Brown

A TREX RANGE FOR EVERY PROJECT

Priced to put pressure on traditional timber decking but still retaining Trex's trusted quality, both the Naturals and Basics collections offer fade and stain protection, as well as enhanced mold and mildew resistance, to make maintenance simple. And because the boards are scalloped, they're as lightweight as timber - without the extra work.

ENHANCE: NATURALS

CONTEMPORARY, MULTI-TONAL APPEARANCE; ALL THE CHARM OF WOOD BUT NONE OF THE TROUBLE

Still designed and engineered for long lasting durability and performance, the Enhance: Naturals range provides unprecedented value. The high performance shell is finished with a natural wood grain embossing for the underfoot feel closest to nature.

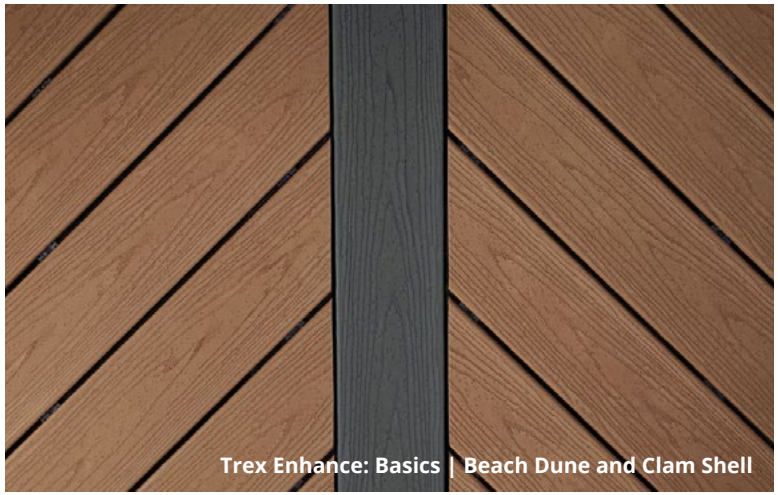
Modern natural earth tone inspired colours with variegated colour streaking sets the Enhance: Natural colour range apart from the Basics.

ENHANCE: BASICS

COMBINING THE DURABILITY OF COMPOSITE WITH THE AFFORDABILITY OF WOOD

Accessibility to Trex has never been more affordable than it is now with the Enhance: Basics range. Available in three neutral mono-chromatic colours, but still featuring high-performance shell technology along with the natural feel of a wood grain embossed finish.

The Enhance: Basics profile has been re-engineered to retain the strength and performance Trex is known for, while becoming more economical at the same time.



Trex Enhance: Basics | Beach Dune and Clam Shell

ELEVATED AESTHETICS PAIRED WITH THE HIGHEST LEVEL OF PERFORMANCE

High performance, premium decking engineered with unrivalled fade, stain, scratch and mould resistance, created with hassle-free maintenance in mind for minimal down time from enjoying your outdoor spaces. Transcend is the leading Trex product line.
